Export Share

Why does TAL have 432 confirmed orders past their ship date with no export invoice?

B

✓ Queried `rag.vw_OrderShipment` · 432 rows

TAL has **432 confirmed orders** whose ship date fell in the last 30 days but which have no export invoice yet[1]. That is the largest backlog of the three factories — RHL has 205, BGL [n].

The data shows *that* the invoices are missing, not *why*. Most often this means the goods shipped but Commercial hasn't raised the invoice, or the ship date wasn't moved after a delay. The orders cluster with a few buyers:

Buyer	Orders	Order qty	Oldest ship date
[Buyer A]	[n]	[qty]	[dd Mon]
[Buyer B]	[n]	[qty]	[dd Mon]
[Buyer C]	[n]	[qty]	[dd Mon]
Other buyers	[n]	[qty]	[dd Mon]
Total	**432**	**[qty]**	

⚠ TAL's line data was last updated 20 Sep 2026. Confirm with Commercial before chasing buyers — some of these orders may already have shipped.
